ANC3B Resolution Supporting Installation of Four Demountable Classrooms at Stoddert Elementary School

Whereas, the problem of limited classroom space at Stoddert Elementary School has caused class sizes to increase and challenges the resources within the footprint of the existing DCPS Stoddert Elementary School building.

Whereas, the established student enrollment based on available DCPS classrooms at Stoddert Elementary School, after renovation was 285, now has a current student enrollment of over 400 and projected enrollment of 429 students for 2014-2015.

Whereas, the Stoddert Elementary School-Glover Park Community Center, conceived and designed as a dual use building, has no other space then the gymnasium currently allocated to DPR. ALL other spaces that were designated for DPR are being used by DCPS to support the additional student enrollment.

Whereas, the Pre-Kindergarten classes formerly housed at Stoddert Elementary School were moved to the Guy Mason Recreation Center due to the increased enrollment of upper grade students at Stoddert Elementary.

Whereas, a waiting list of over 150 students exists for the Stoddert Elementary School.

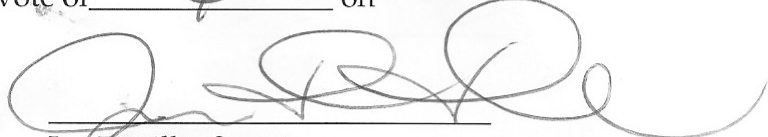

Whereas, Stoddert Elementary School is being forced to consolidate the library and computer lab to create an additional classroom.

Therefore, be it resolved that ANC 3B supports and seeks DCPS action to expeditiously evaluate and install demountable classrooms adjacent to the existing Stoddert Elementary School, 4001 Calvert St. NW Washington, DC 20007.

The resolution was 4 by a vote of 0 on
