ANC 3B Resolution Supporting Speed Cameras, Bus Stop Changes and Additional Features to Improve Pedestrian Safety on Wisconsin Ave.

Whereas ANC 3B supports the return of the six lane traffic pattern to Wisconsin Ave. in Glover Park provided that the change is accompanied by appropriate alternative measures to increase pedestrian safety.

Whereas ANC 3B representatives have met with DDOT and neighboring ANCs to develop appropriate plans for such changes and improvements.

Whereas smart sign/speed cameras, crosswalk cameras, rumble strips, and stop sign cameras have been identified as a potential mechanisms for enhancing pedestrian safety and the Metropolitan Police Department (MPD) has been consulted to identify the appropriate types and locations for speed moderating equipment.

Whereas the intersection of Wisconsin Ave. and Fulton St. is non-signalized, and therefore inherently more dangerous for crossing than the signalized intersection at Wisconsin Ave. and Garfield St.

Whereas the bus stop at Wisconsin Ave. and Fulton St. creates a significant number of pedestrians wishing to cross the street at this location.

Whereas moving the bus stop from Fulton St. to Garfield St. will shift more pedestrian traffic to the safer, signalized intersection without adversely impacting bus stop access for riders.

Therefore, be it resolved that ANC 3B supports and seeks DDOT action to implement the following in conjunction with the return to the six-lane traffic pattern on Wisconsin Ave.

- Traffic speed cameras, in multiple locations - both north and south of the Glover Park commercial district - on southbound Wisconsin Ave. between Mass. Ave. and 35th St.
- Moving the Wisconsin Ave. bus stops - including the bus shelter - from Fulton to Garfield St.
- Installation of additional pedestrian safety features, such as HAWK signals, rumble strips and improved signage at Wisconsin Ave. and Fulton St.

The resolution was 5 by a vote of 0 on February 18, 2013.
